

Yess Soft

Engineering software that scales with your ambition.

Yess Soft is the engineering core of the YESS Bangla group — a product studio that ships secure, observable, cloud-native software for ambitious teams. From single-screen MVPs to multi-tenant ERP platforms, every release is built with TypeScript, automated tests, and a relentless focus on time-to-value.

Highlights

- Web & mobile application development
- ERP, CRM & inventory management systems
- UI/UX design and product strategy
- Cloud-native, secure and scalable architectures

Services

Web Development · Mobile Apps · ERP Systems · Cloud Solutions · UI/UX Design

Audience

Startups, SMEs, enterprises and government agencies seeking digital transformation.

Challenge

A national distributor was running 11 disconnected spreadsheets and three legacy desktop apps — orders were being missed, inventory was wrong by 18%, and finance closed the books two weeks late.

Our solution

Yess Soft replaced the legacy stack with a single multi-tenant ERP — orders, inventory, fleet and finance — wired into a real-time analytics layer and mobile apps for the field team.

Delivery phases

1. Discover

Process mapping with 14 stakeholders, KPI baselining and an executive scorecard.

2. Design

Role-based UX, design system and clickable prototype validated with end-users.

3. Build

Two-week sprints, automated test suite, weekly demos and zero-downtime deploys.

4. Launch & grow

Phased rollout across 7 depots, training videos and a 90-day improvement retainer.

Capabilities & stack

TypeScript, React, Node.js, PostgreSQL, Redis, AWS, Cloudflare

Outcomes

- 99.4% — Inventory accuracy
- " 61% — Order cycle time
- 3 days — Finance close
- 99.97% — Uptime

Key milestones

- 2018 — Founded: Yess Soft launched with a focused team and a clear mandate: engineering software that scales with your ambition.
- 2019 — First scale milestone: Shipped the v1 platform and onboarded our first cohort of startups.
- 2020 — National footprint: Expanded operations across major Bangladesh markets with reliable SLAs and a dedicated success desk.
- 2021 — International standard: Adopted enterprise-grade tooling, audited processes and a public quality scorecard reviewed each quarter.
- Today — Where we are now: Clients across BD, UAE & UK — and still investing in the team, the tech and the experience.

Engagement packages

Starter — On request Per project

A focused engagement to validate fit and ship a first web development outcome.

- Discovery workshop & written scope
- Single delivery sprint
- Email support, business hours
- 30-day post-launch warranty

Growth — Tailored Quarterly retainer

For teams scaling Yess Soft into a core part of their operation.

- Dedicated delivery pod
- Quarterly roadmap reviews
- Priority support, 24/5
- Performance & quality scorecard

Enterprise — Custom Annual partnership

White-glove partnership with SLAs, dedicated leadership and custom integrations.

- Named account leadership

- 24/7 incident response
- Quarterly business reviews

FAQs

Q: How do we get started with Yess Soft?

A: Reach out via the contact form. A specialist will respond within one business day to schedule a 30-minute discovery call and share a written scope and indicative timeline.

Q: Who is Yess Soft best suited for?

A: Startups, SMEs, enterprises and government agencies seeking digital transformation. We work with organisations of every size — from early-stage teams shipping a first product to enterprises modernising legacy operations.

Q: What does pricing look like?

A: Every engagement is scoped to outcomes rather than hours. Most partners start with our Growth tier; Starter is ideal for a focused proof-of-value and Enterprise unlocks dedicated leadership and custom SLAs.

Q: How do you ensure quality and accountability?

A: Each engagement has a single accountable lead, a written success scorecard reviewed every two weeks, and a transparent change-control process. We publish quarterly business reviews for all retainer clients.

Q: Can you work with our existing vendors and tools?

A: Yes. Yess Soft is designed to integrate cleanly with the platforms you already trust — we'll map dependencies during discovery and propose the lightest-touch integration that meets your goals.

Q: What support is available after launch?

A: All tiers include a post-launch warranty period. Growth and Enterprise partners receive ongoing support with documented response-time SLAs, monitoring dashboards and an escalation path to senior leadership.
